EFFICIENT
MANAGEMENT FOR
WHOLESALERS AND
TUROPERATORS

Know most complete and advanced software for the management of your business as a Touroperator

This software allows a Touroperator to become a single information system.

It is a complete and advanced software that gathers the experience of Viavox and offers solutions to companies in this sector.

Our business model allows you to have an updated solution. Adapt your solution with the elements that your business requires the start of your project, but with the flexibility of being able to add other modules, as your needs change in the future.

General characteristics

You can manage your online business, update availability and change prices instantly.

Everything is integrated, which will optimize the available resources, improve the organization and improve the performance of the company.

Manage different distribution channels where you can decide which products and at what prices are offered.

Web adapted to any mobile device and tablets, providing a totally satisfactory experience.

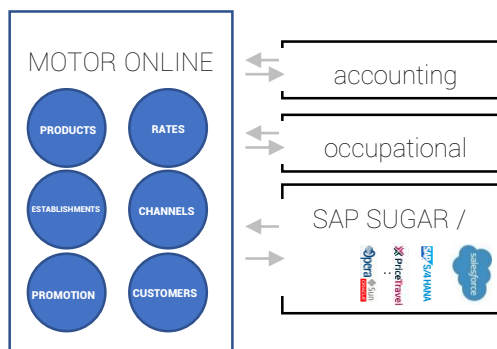

Why choose Viavox Travel

We adapt a solution with only those modules that your business requires at the beginning of your project, but with the flexibility of being able to add other modules, as your business evolves.

What you get with Viavox Travel for your company ...

- Improvement in decision making, getting faster and more informed in various situations and problems
- Prediction and realization of future scenarios thanks to quality information
- We can adapt our solutions to the needs of your company
- Automation of daily business processes, allowing staff to perform more productive activities
- Improve the operational efficiency of your company, maximize your profits on sales and, therefore, optimize the return on your investment
- Improve the company's productivity
- Manage all the business rules you want and generate above-average returns, simultaneously, for your B2B partners and for your company
- We can offer you advisory and technological consulting services, thus becoming your technological and strategic partner

Viavox Travel action line: License Concept

About Viavox Travel...

VIAVOX Travel was created to facilitate the comprehensive management of tourist products for tour operators, travel agencies and other tourist entertainment companies in a variety of roles and industries.

Born as a result of 17 years of experience in the tourism sector and as a result of meeting the needs of our customers. Therefore, we have a team of professionals in charge of helping to achieve success for each company that trusts us in their tourism management.

We are specialists in digital transformation for tourism businesses as well as having a close relationship with other organizations in the sector.

Viavox Travel offers a complete range of solutions (ERP, Customer Experience ...) as well as added value services (systems integration, business and technology audits, advice, etc.) that help organizations in their adaptation to the new environment.
